

“The product recognition function of this AI scale is much faster and more accurate than its peers. It allows new staff to get started quickly and greatly speed up the sales of fresh products.”

CEO, Chinese Supermarket Chain

## EVALUESERVE

AiLENZ Intelligent Scale is a smart scale and point-of-sale solution that uses advanced computer vision and AI technology to detect and weigh grocery products. With growing demand for automated solutions, the AiLENZ Intelligent Scale eliminates the need for store employees to manually punch in individual SKUs to increase employee efficiency and improve in-store customer experiences. Long term, retailers can leverage data collection and processing from the Evalueserve solution to shorten checkout lines and make data-driven decisions that optimize customer traffic and product placement.

# AiLENZ Intelligent Scale

Improving Checkout Processes with Smart Scale Technology

**Key Features**

-  Automated SKU recognition with high accuracy and speed
-  Device agnostic for seamless integration
-  Easy addition of new SKUs at the Edge

**Verticals:**

- Retail
- Hospitality

**Use Cases:**

- Product Inspection
- Asset & Operations Optimization

**Country/Geo:**  
Global
